# Green Design

Easy Green Australia is a branch of a French company which has almost 10 years experience in preserved green wall. We have our head office in France, a subsidiary in Switzerland and now one in Australia to propose projects all around the World.

---

Easy Green Interior has a reputation for customisation, quality and timelessness in every green design and decoration, with a specialisation in innovative green wall designs. Carefree, stunning and unique, our Easy Green designs bring the outdoors indoor, and are environmentally friendly. Our preserved designs do not need to be watered or fertilised, saving thousands of litres of water of years!

---

We are dedicated to bringing new designs and a natural effect to a range of interiors. We design with the mission to create unique structural elements that transform the social spaces of the modern day room.

## THE GREEN REVOLUTION IN INTERIOR DESIGN MADE IN AUSTRALIA

Our experienced team hand crafted each of our artwork in our factory in Victoria , each work is made with preserved natural plants that's make every project unique

**Our natural process** gives the plants long lasting durability.

These green works of art can remain beautiful for years and retain their natural look and feel.

- THEY DON'T NEED TO BE WATERING

# REINDEER MOSS

## Product Features

Our reindeer moss has the most important benefit for commercial use

### Natural & Authentic

Only 100% natural and authentic Reindeer Moss (*Cladonia stellaris*) used.

### High Class Sound Absorber

Absorbing up to twice as much as the industry average for products of same size and thickness.

### Environmentally Friendly

Our Reindeer Moss is hand picked with care for nature, and certified & approved by ISO 9001 and ISO 14001 standards.

### Fire Resistant

Easygreen Reindeer Moss is certified by ISO 11925 2 for interior use.

### Air Purifying

Through a constant cycle of absorption and release of ambient moisture, air particles are removed.

### Natural Humidity Indicator

Reindeer Moss dries when the relative humidity falls below 40%, and returns soft again above 40%.

### Hypoallergenic

Easygreen products do not contain toxic chemicals or components.

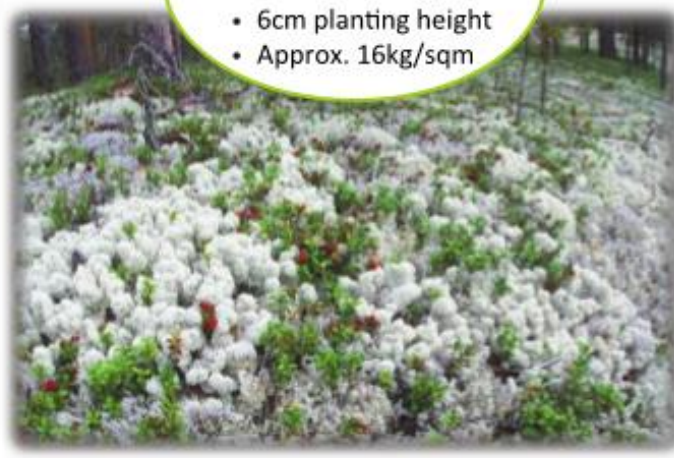

### Maintenance Free

The Reindeer Moss does not require any sunlight, watering or pruning.

## Technical info

- 12mm mdf support
- 6cm planting height

HUMIDITY LIKE A SPONGE

easygreen  
INTERIOR

Easy green creates with preserved plants the beautiful tree, bonsai and custom interior garden. We choose the preserved foliage, the trunk and the pot so that tree is in harmony with your interior.

### **1. Are the plants in Easy Green Interior designs real ?**

Yes, the plants in each of our designs are real and preserved with natural products in an ecological process.

### **2. How are the plants are preserved ?**

From the harvesting of the plant, moss or flowers, the plants are then soaked in a specific mixture of 100% plant-based and bio-degradable preservation formula.

### **3. Do Easy Green Interior designs require care or maintenance ?**

Our Easy Green Interiors designs are just that – easy and stress-free for you to take care of! The maintenance process is not too extensive. For our glycerine-coated walls, logos and decorations, a simple dusting every 6 months does the job!

### **4. What are the best conditions for preserved plant designs ?**

To ensure that your green walls and decorations can last for longer, position the designs so that they are not exposed to direct sunlight. Rooms with less than 70% lighting are recommended for our green walls.

### **5. How long do the preserved plants last ?**

Our range of preserved plants and flowers can last for different amounts of time.

- Flowers can last from 6 months up to 6 years.
- Ferns can last from 6 months to 10 years.
- Moss can last from 6 months to 25 years.

To better understand just how long our preserved products will last in your environment, [contact us](#) for a free consultation and quote.

### **6. What happens when the green walls are exposed to direct sunlight? How will this affect the levels of humidity given off by the walls ?**

Direct sunlight effects our plants in different ways

With moss, it becomes lighter and the bright colours appear to fade.

With our ferns, they tend to retract whilst our flowers also lose colour but become very dry as well.

### **7. Do Easy Green Interior plants have an odour ?**

The moss does have a natural odour that diminishes over time. However, our flowers do not have any odour.

### **8. Are the products fine to be installed in public spaces ?**

Of course! Reindeer moss is extremely well suited for public spaces, not just for its beauty, but because of its fireproof quality.

### **9. Do they have an impact on the acoustics of a particular surrounding ?**

Our walls do affect the acoustics of the surroundings it's placed in. They actually help to absorb large noises and vibrations as a result of their unique genetic makeup when compared to a traditional wall.

### **10. Does Easy Green Interior install the designs ?**

Yes, we do install all walls, however with our frames for the green logos, the client has the choice of installing them themselves if they so wish!

### **11. So how much does the designs cost ?**

Depends on the project! We would be happy to provide you a quote for your special needs, so contact our team today! Our green walls are half the price of a natural green wall, and last much longer! Once you pay for your design, there is no future unexpected costs. The designs do not require electricity, water, or maintenance spending.

### **12. Have you undertaken projects all around Australia ? And overseas ? Do you make project all around Australia ? Overseas ?**

We design and install projects around Australia. Our team originally started creating our designs in Europe, and our products have made their way overseas due to huge popularity! We have design and manufacturing partners all around the world, with past experience in France, Switzerland, Belgium, Italy, Germany, USA, Taiwan and Australia!

### **13. What about biosecurity risks ?**

Easy Green Interiors takes responsibility for importing all of the products required for the designs. We are in direct contact with the Australian Government Department of Agriculture so there is no risk for the client.
